ORDERING STEPS

HOW TO USE

Step 1	Put silky primer on the cotton pad then clean the eyelashes and around with it. Dust and grease the hands and eyelashes can affect the effect of the glue.
Step 2	Put the glue to the back of silicon pad and attach it along the eyeline.
Step 3	Apply glue evenly to the front of the silicon pad and use lifting tools to attach eyelashes on it
Step 4	Squeeze step 1 cream on a disposable palette. With lifting tool apply cream to the eyelashes carefully. (Be aware not to get in the eye) Wait 10-15 minutes
Step 5	Use cotton pad to clean the cream. Be careful to wipe upward from the base of the eyelash to avoid getting into the eye.
Step 6	Squeeze Step 2 cream on a disposable palette. With lifting tools apply cream to the eyelashes carefully. (Be aware not to get in the eye) Wait 10-15 minutes
Step 7	Use cotton pad to clean the cream. Be careful to wipe upward from the base of eyelashes to avoid getting into the eye.
Step 8	Put on the Keratin Booster to the eyelashes. Remove the silicon pad and clean around the eye.

IMPORTANT NOTES

✓	Do not use on weak or easily cut eyelashes
✓	If cream got into your eyes, please wash them in running water. If there is any irritation please stop using it right away.
✓	Do not use it other than those set out in this guide.
✓	Make sure when you use the cream, must follow the step. Creams are made for one-time use only. Please use immediately after its release. Keep away from direct sunlight and children.
✓	Recommended indoor temperature: 18-28°C (64.4-82.4°F)
✓	Eyelash thickness affects lifting result. Remaining oil on the eyelash will affect lifting result.
✓	Step one cream must be wiped clean after using then start Step two cream.
✓	Please do not use alkaline products for cleaning.
